Notes and features

- The Alliance Forestar 344 is a powerful forestry tyre for CTL machines.
- The steel-reinforced nylon casing, the special rubber compound, as well as the reinforced sidewalls, protect the tyre against punctures.
- The traction tread pattern with low-angled lugs provides excellent grip and good self-cleaning thanks to wide gaps between the lugs.
- Due to the close spacing of the lugs in the centre of the tread, the rolling resistance can be reduced on hard surfaces.
- Matching chains and ribbons are available on the market.
